ANISH VELAYUDHAN KUTTY

Director, Product & Design

Design & Product Executive | AI-Native Enterprise Transformation

Charlotte, NC | +1 980 860 1544 | anishv.info@gmail.com | LinkedIn

EXECUTIVE PROFILE

Design and product executive with 15+ years building design organizations and shaping complex enterprise products across AI, healthcare, retail, financial services, and enterprise technology. CEOs and COOs tend to bring me in when the problem is ambiguous and the stakes are real. My path started in creative practice and design education, moved through enterprise UX leadership, and now spans product strategy and organizational transformation. That range is what lets me sit comfortably with a data scientist and a CFO in the same week.

SIGNATURE IMPACT

15+ yrs Design & Transformation | Enterprise platform rebuilt & shipped in ~60 days | 100+ products | 90% faster content time-to-market | 28% fewer repeated searches | <1% customer change requests | 4,000+ employees trained — creative thinking & photography | Top 250 Great Managers in India — 2021

PROFESSIONAL EXPERIENCE

TRESATA Director, Product & Design (formerly Director, UX Design) *Mar 2023 – Present*

Promoted from Director, UX Design to a dual Product & Design mandate; served as India Site Head before relocating to Tresata's North Carolina headquarters.

- Led design for Tresata's enterprise data platform end to end, covering strategy, team, and product vision, through the company's shift from customer-intelligence software into agentic-AI data infrastructure. The core problem: turning fragmented enterprise data into governed, agent-ready data products.
- Turned a terminal-based, highly technical workflow into an intuitive SaaS product used by enterprise customers in finance, insurance, healthcare, manufacturing, retail, and public administration — 15+ industries in all.
- Joined after roughly six months of external investment hadn't produced the intended product direction, with no time for a normal ramp-up. Within about 60 days, a lean team and I had shipped a full enterprise-scale product experience, around 5,000 screens.
- Built and led a team spanning design, product, data engineering, and data science, all pointed at the same customer and business outcomes.
- Helped land two contracts with a Big Four firm, roughly $600K and $500K. That initial ~$1.1M engagement grew into a multi-million-dollar, multi-year AI transformation partnership, and the product is now used by thousands of people across its tax organization.
- Pushed the product away from deterministic, multi-step workflows toward AI-native interactions, on the belief that intelligence itself can be the interface rather than a feature bolted onto one.
- Partnered closely with senior technology and business leadership, and contributed to AI innovation work with MIT.

INDEGENE Director, UX Design *Jun 2019 – Mar 2023*

Reported to the COO. Led a 7-designer enterprise design office and UX strategy for 5 product lines, and extended practice guidance to other business units whose work reached multiple geographies.

- Built the enterprise design practice from scratch: standards, maturity models, governance. Design went from an execution function to a strategic one.
- Led experience strategy across the pharmaceutical drug lifecycle, simplifying workflows that spanned regulatory approval, content, documentation, renewals, and go-to-market.
- Led design vision for iPlan, the Intelligent Content Management System (ICMS), and Intelligent Modular Content (IMC), bringing together pharmaceutical workflows that had been scattered across teams, systems, and geographies.
- Delivered a 90% improvement in content time-to-market and a 28% reduction in repeated searches, with customer change requests on key initiatives staying under 1%.
- Worked directly with leading global pharmaceutical companies and cross-functional teams across medical, regulatory, scientific, content, marketing, technology, and product.
- Introduced Agile/Scrum design practices. Led distributed teams through COVID, focusing on empathy and recognition without losing sight of performance. Piloted metaverse-based experiences for global pharma conferences.

- Recognized: Top 250 Great Managers in India — 2021 (People Business / The Economic Times).

WALMART LABS UX Architect — Merchant Technology *Oct 2017 – Jun 2019*

- Established UX and Design Thinking practices within Merchant Technology, working closely with product, engineering, and business leadership across the U.S. and India.
- Led design for a global warehouse space management platform, testing it across multiple U.S. locations and refining it based on real operational feedback.
- Designed Walmart's next-generation global discount pricing experience, and contributed to the company's global design system.
- Recognized: Bravo Award — Design Excellence.

EARLIER EXPERIENCE

SOFTWARE AG — Senior UX Designer, R&D | Apr 2016 – Sep 2017. Brought user-centered design into a strongly engineering-led global software organization. Designed experiences for invoice management and workflow automation solutions, simplifying enterprise workflows that had grown genuinely complex. Also established UX standards and design systems, and ran Design Thinking sessions across engineering teams. Recognition: Design Focus Award; Wall of Fame, Software AG; several other innovation and design excellence awards.

INFOSYS / EDGEVERVE SYSTEMS — Graphic Designer → Lead Graphic Designer → Member, User Experience | 2012 – 2016. At Infosys, progressed from Graphic Designer to Lead Graphic Designer, delivering enterprise branding, communications, and employee-engagement work that reached over 4,000 employees. Along the way, contributed to Infosys Science Foundation events involving Infosys Science Prize-winning scientists, and shot large-scale visual storytelling and aerial photography for Infosys development centers across India. Later moved to EdgeVerve Systems as a founding member of the User Experience Center of Excellence, building sourcing, procurement, vendor management, and contract lifecycle platforms for complex enterprise workflows. Recognition: Best Contributor, Branding & Communication; Skywalk Design Award; a founder appreciation certificate.

INDUSTRY & ACADEMIC LEADERSHIP

National Institute of Fashion Technology (NIFT) — Guest Lecturer | External Jury • Karnataka Chitrakala Parishath — Curriculum contributor, Bachelor's & Master's Applied Arts programs • Institute of Product Leadership — Industry Jury & Guest Speaker • IIM Lucknow — Invited Speaker, Leadership Talk Series • Wiztoons Animations — Senior Mentor, Graphic Design

EDUCATION & CERTIFICATIONS

Master of Visual Arts — Karnataka Chitrakala Parishath | 2009–2011 • Bachelor of Visual Arts — Karnataka Chitrakala Parishath / Kalamandir School of Arts | 2004–2009

Certified Usability Analyst — Human Factors International • Certified Design Thinking Champion — Software AG Corporate University • Improving Your Product Sense — High Leverage Inc. • AI for Everyone — DeepLearning.AI • Advanced Digital Photography — Drishti School of Photography • Certified Metaverse Works Expert — Blockchain Council • Claude Academy: AI Capabilities and Limitations • Claude Academy: AI Fluency — Framework & Foundations

AWARDS & RECOGNITION

Top 250 Great Managers in India — 2021 | Bravo Award — Design Excellence, Walmart Labs | Design Focus Award, Software AG | Wall of Fame, Software AG | Best Contributor — Branding & Communication, Infosys | Skywalk Design Award, Infosys | Nanjundashri Founder's Award — Design Excellence, College of Fine Arts

LEADERSHIP PHILOSOPHY

Across every role, the common thread hasn't been one design discipline. It's the ability to make sense of ambiguity, find what actually matters, and turn a half-formed idea into something people use. That habit started early, in an independent creative practice, long before it became a management skill, and it still shapes how I build teams and products today.
